

ANUSHKA DABHADE

+91 9657051895 | anushka.dabhade23@vit.edu | Pune, Maharashtra | [GitHub](#) | [LinkedIn](#) | [LeetCode](#)

EDUCATION

Vishwakarma Institute of Technology (VIT), Pune
Bachelor of Technology in Computer Engineering

2023 – 2027
CGPA: 9.19 / 10

TECHNICAL SKILLS

Core CS: Data Structures & Algorithms, Object-Oriented Design, Operating Systems (Linux/Unix), Computer Organization & Architecture, System Design, Complexity Analysis, Problem Solving

Systems & Low-Level: Compiler Design (Flex, Bison, LLVM IR generation & optimization), x86 Assembly, Embedded Systems (Arduino), Microcontroller Programming

Languages: C/C++, Python, Java, JavaScript, SQL

Databases: MySQL, PostgreSQL, MongoDB, SQL-Spark, Vector Search, Graph-based Retrieval

Cloud & Tools: AWS (S3, Lambda, Solutions Architecture), Docker, Git/GitHub, Shell Scripting, CI/CD

AI/ML: LangChain, LangGraph, RAG, NLP, PyTorch, TensorFlow

Practices: Agile Methodologies, Code Reviews, SDLC, API Development, Testing, Debugging & Troubleshooting

PROJECTS

Mini C Compiler with LLVM Backend | *Flex, Bison, C++, LLVM, Graphviz*

- Built an end-to-end compiler pipeline for a C-like language: lexical analysis, parsing, AST construction, and semantic analysis with symbol table validation.
- Generated and optimized LLVM IR using LLVM's PassManager (O2 pipeline), cutting IR instruction count by up to 90% on test cases; implemented CFG visualization with Graphviz for program analysis.

Medicator – Automated Prescription Dispensing System | *React Native, MySQL, Arduino, Embedded Systems* | **Published Indian Patent**

- Built a multi-tiered QR-based dispensing system integrating embedded hardware, a database layer, and a cloud-backed application tier, with real-time verification logic and secure data flow between application and microcontroller.

Sensitive Data Leakage Detection in Images | *Industry Project, Barclays* | *Python, OCR, NLP, Computer Vision, Streamlit*

- Built an OCR- and NLP-based extraction and classification pipeline processing unstructured image data at scale to flag PII exposure in fintech workflows.
- Redesigned the confidence-scoring engine, driving false positives to zero.

Intelligent Document Processing | *Industry Project, Accion Labs* | *Python, LangGraph, Vector DB, Graph DB*

- Contributed to a scalable pipeline for ingesting, chunking, and indexing large unstructured document sets, and to a hybrid retrieval system combining vector search with graph-based traversal for structured querying.

CERTIFICATIONS

- SQL (Advanced) — HackerRank, Verified — query optimization, data modeling, indexing, window functions, pivots
- AWS Solutions Architecture — Certification
- Ab Initio Data Engineering Program — Barclays × Ab Initio, 2025 — Top 30 rank; ETL pipeline architecture and Ab Initio's core components

ACHIEVEMENTS

- Solved 500+ DSA problems across LeetCode, CodeChef, and GeeksforGeeks.
- Ranked in the top 80 of 18,000+ applicants (top 0.4% across India) in the LinkedIn CoachIn Mentorship Program 2025.
- Selected in the top 100 for Citi Bank's CitiBridge Program '26 (banking systems, financial technologies, enterprise-scale applications).
- Ranked top 30 in the Barclays × Ab Initio Data Engineering Program 2025.
- Published 2 Indian patents (Medicator, ExpenselQ); Scopus-indexed publication on Voicify, a multilingual TTS system.

LEADERSHIP

Technical Head — Computer Students Association, VIT Pune

(2025 – 2026)

- Mentored and led a team of 40 developers across AI/ML, App Dev, Web Dev, and Research.

Management Head — Abhivridhi, Student Training & Development Committee, VIT Pune

(2024 – 2025)

- Led a team of 50 members to organize state-level events with a footfall of 800+.
